

COMMUNITY SUPPORT AND STRATEGIC ADVICE

Empowering communities leads to better informed discussions with industry, government and fellow stakeholders throughout the planning, approval, implementation and closure of large developments.

We can help your organisation or group to interpret technical reports and government regulations, prepare submissions and develop strategies to maximise the benefits of projects while minimising the impacts on your community and the environment.

Stakeholder support - planning for mining, Aurukun

Sustainable Solutions Global will help you:

- ⊗ **Understand** the potential impacts of developments so you can make informed decisions for the future.
- ⊗ **Increase your technical understanding** of the potential environmental and social impacts of the proposed development.
- ⊗ **Increase your capacity to influence decisions.**
- ⊗ **Increase your understanding of regulatory and legal requirements** for developments.
- ⊗ **Increase your capacity to monitor** project compliance.
- ⊗ **Make your participation in community consultation and engagement more effective.**
- ⊗ **Minimise the social and environmental risks to your community.**

The SSG Approach

Sustainable Solutions Global provides strategic social and environmental advice and management expertise to community and stakeholder groups affected by resource or industrial developments and associated infrastructure, as well as to the mining, oil and gas, energy, transport and agricultural industries.

Industry Experience

Our industry experience means we can explain the potential impacts of projects and the available technical solutions to community groups and local government and interpret any relevant laws and regulations. We can also assist groups to monitor impacts by assessing baseline conditions and then measuring factors such as water quality, noise and traffic.

Effective Communication

Communication is often the key to mutual understanding. We can assist community groups to develop effective and well-informed communication pathways between fellow stakeholders, government and representatives of the project developer and the media.

Capacity Building

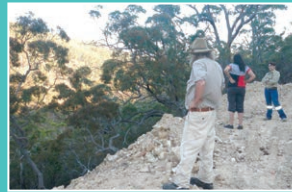

We seek to empower you by transferring skills and knowledge to increase your capacity for meaningful involvement in the consultation and approval process for developments.

Community planning

Stakeholder consultation

Community inspection of mine

Stakeholder engagement

NOTABLE PROJECTS

We have transferred skills and knowledge and provided strategic advice to communities living next to the following large, complex projects:

- ◆ Local villagers and Indonesian Government - Kelian Gold Mine, Indonesia
- ◆ Local landholders - Ok Tedi, Lihir, Porgera, Kianatu - Papua New Guinea
- ◆ Local villagers and Government of Lao PDR - Sepon Gold and Copper Operations, Lao PDR
- ◆ Eacham Shire Council - Local land development, Australia

Walsh River and Herberton Town Communities - Baal Gammon Copper mine, Australia

We reviewed reports on technical problems associated with the tailing dam for community members living downstream of the dam, assisted community members to collect water monitoring data, and provided technical advice throughout negotiations with the mining company.

Tablelands Wind Turbine Action Group, Australia

Commissioned by the Tablelands Wind Turbine Action Group, a community group of concerned stakeholders, SSG conducted an assessment of the Environmental Impact Statement for a proposed Wind Farm at Mt Emerald. We then presented the findings and facilitated a public stakeholder meeting.

Aurukun Shire Council – Aurukun Bauxite Proposal, Australia

We reviewed documentation for a bauxite proposal near Aurukun and presented a summary of issues to the Council to assist them in negotiating with potential proponents of a new proposal.

We also assisted at meetings between the Council and the proponents to explain the environmental and social implications of the various proposals.
